

## The Company

The company was founded in 2013 with the vision and mission of solving common banking issues by empowering customers to make their own decisions with a plethora of payment options. Even though banking has been evolving over the years to provide instant access to certain processes and views, bankers are still holding on to certain processes that should be handed over to their customers to make their own decisions.

We believe that empowering customers will create deeper relationships and unbreakable loyalty all while building an excitement and need that will attract new customers.

Simple and secure along with creating a new level of expected service and control your customers deserve.
